DETAILED ACTION

Election/Restrictions

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 16 to 29, drawn to a semiconductor device, classified in class 257, subclass 734.
- II. Claims 1 to 15, drawn to a method of providing an interconnect o a semiconductor device, classified in class 438, subclass 15+.

The inventions are distinct, each from the other because of the following reasons:

Inventions I and II are related as process of making and product made. The inventions are distinct if either or both of the following can be shown: (1) that the process as claimed can be used to make other and materially different product or (2) that the product as claimed can be made by another and materially different process (MPEP § 806.05(f)). In the instant case, instead of etching a plurality of device structures in the EPI layer, it can be performed by a mechanical means.
